

# STB Installation Guide

## ■ Composition

## ■ Front Panel

- Do not block the infrared remote control receiver window.
- Do not put heavy objects on the machine.
- Keep away from the water, stay dry.
- If restart is required, please reconnect the power cord.

## ■ Rear Panel

### Notice for STB

- ① You can mark the STB, it would be easier to identify.
- ② When you shut down STB, it would ask you to login again. In this case, you can reboot it without enter the account and password again.

### Notice for Remote Control

- ① We recommend using secondary battery. Do not use alkaline battery.
- ② We recommend taking battery out of remote control when nobody use it.
- ③ The infrared ray receiver of STB can't be blocked by anything.
- ④ No matter using the student's or the teacher's remote control, they can control the STB player box. But in some classrooms, they would be disturbed because of the seat space allocation. We recommend you to plaster insulation tape on infrared ray and prick a hole. Therefore, remote control won't be disturb by infrared ray.
